

SAI OOTEJ REDDY BACHAPALLY

+9132802105 | saiootej.bachapally@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

An experienced Software Engineer with a background in full-stack and blockchain solutions, adept at building responsive UIs and APIs. Demonstrated proficiency in spearheading digital currency projects and engineering network platforms at a national payments corporation, as well as leading successful data extraction projects at a software enterprise. Passionate about leveraging technical expertise to innovate and advance software engineering outcomes in diverse and dynamic environments.

EDUCATION

University of Central Missouri

Master's, Computer Science

January 2023 - December 2024

GPA: 4.00

- Cloud Computing, Advance Software Engineering, Advance Computer Networking Security, Information Assurance

M S Ramaiah Institute of Technology

Bachelor's, Computer Science

August 2018 - July 2021

GPA: 3.66

Nutan Vidyalaya Society's Polytechnic

Diploma of Education, Computer Science

July 2014 - June 2017

GPA: 3.55

PROFESSIONAL EXPERIENCE

Grow Your Business

Web Developer Intern

Stamford, Connecticut, United States

August 2024 - Present

- Designed and deployed web pages using React, NodeJS, and Figma for GYB Quality Metrics, enhancing user experience and interface consistency
- Engineered responsive landing pages and optimized functionality, improving performance on both desktop and mobile platforms.
- Monitored SAC App status by logging data into Prisma and dynamically rendering web pages based on database updates.

Headstarter AI | Software Engineering Fellowship (SWE Fellow)

SWE Fellow

Long Island City, New York, United States

July 2024 - Present

- Currently building 5 AI Projects within my chosen track A, where the overall goal is to achieve either \$1000 in revenue, create 1000 accounts, or have 1000 people on waitlisted.
- Immersed in a collaborative environment while working along with SWE leaders from Google, Apple, Meta, and Bloomberg, and other successful start-up companies.
- Developed a personal brand and expanded professional goals through networking, interview preparation, and teamwork, while growing academically in a challenging 9-week environment.

National Payments Corporation of India

Software Engineer

Hyderabad, Telangana, India

July 2021 - January 2023

- Played a key role in the development team for building a blockchain-based digital currency platform (E-Rupee).
- Engineered a responsive UI for a blockchain-based digital currency platform using React, TypeScript, HTML, and CSS, boosting performance by **10%** through Redux state management, lazy loading, and debouncing techniques.
- Created role-specific dashboards to visualize digital currency operations, highlighting creation, approval, recall, and transaction data.
- Developed interactive transaction tables with features like pagination, filtering, and sorting, for user and central bank roles.
- Developed backend as a simulator using NodeJS with typescript to support digital currency integrated with UPI system.
- Developed Node.js RESTful APIs using typescript to integrate Hyperledger Fabric blockchain using Fabric Gateway API.
- Implemented APIs to store blockchain-endorsed metadata in Scylla DB, leveraging its high-performance for faster data retrieval.
- Enhanced data security and reliability by implementing Kafka with SSL properties for asynchronous data processing.
- Deployed Kafka with Kubernetes to process streaming data in real-time.
- Led the automation of functional testing procedures using Groovy and Katalon framework, reducing manual testing effort by **20%**.

Precisely | Trust in Data

Associate Software Engineer

Noida, Uttar Pradesh, India

March 2021 - June 2021

- Spearheaded the CTO Dashboard Data Extraction project, utilizing Python scripts for data retrieval and analysis from JIRA via APIs.
- Developed Python Flask APIs to store Excel data in MySQL database, supporting informed decision-making through data analysis.
- Validated software by developing, reviewing, and executing test cases and scripts within Agile sprints.

Trident Sugars Limited

Junior Software Engineer

Zaheerabad, Telangana, India

June 2017 - July 2018

- Developed the Customer and Distributor Management System (CDMS) for the organization using the Java Spring framework, enhancing operational efficiency and data management.
- Designed and implemented RESTful APIs to manage customer profiles, distributor details, and order processing, improving data accessibility and integration across systems
- Managed database interactions with Spring Data JPA by designing the schema for customers, distributors, and orders, and implementing CRUD operations through repository interfaces like CustomerRepository and OrderRepository.
- Secured the system using Spring Security by implementing role-based access control and JWT authentication, ensuring that only authorized users had access to sensitive operations.

SKILLS

Programming and Web Services: TypeScript, Python, JavaScript, SQL, RESTful APIs, Apache Kafka, Microservices
Full-Stack Technologies: React.js, redux-toolkit, Node.js, Express.js, Spring Boot, Spring JPA
Databases and Blockchain: MongoDB, ScyllaDB, PostgreSQL, Hyperledger Fabric
Cloud Technologies: Git, Docker, AWS (S3, EC2, RDS, Lambda, VPC), Networking (subnets, load balancers), Kubernetes
Software Testing: Automation Testing, Unit Testing, Jest
Methodologies and Processes: Agile, Software Design, MVC, Design Patterns (Singleton, Adapter)
Soft Skills: problem-solving, Adaptability, Teamwork, Research, Communication

PROJECTS

[foobiePanda.com](#)

Overland Park, KS, USA
March 2024 - June 2024

- Architected and developed a full-stack food ordering platform using React.js, Node.js, Express.js, and MongoDB.
- Improved the platform's usability with efficient search, sort, filter, and pagination functionalities, along with real-time order status updates through API polling
- Integrated third-party services (Cloudinary, Stripe, Auth0) and utilized modern frontend libraries (React Query, React Hook Forms, Tailwind CSS, Shad CN) to create a robust, secure, and responsive application.

SMART-STREAM

Overland Park, KS, USA
January 2024 - January 2024

- Developed a GPT-powered Netflix UI clone application using React.js, Tailwind CSS, and Redux Toolkit.
- Implemented secure user authentication with Google Firebase and integrated a GPT-powered search for effortless movie suggestions.

CERTIFICATIONS

Certified Hyperledger Fabric Developer (CHFD) issued by Kerala Blockchain Academy (07/2022).
